

LONDON METAL EXCHANGE

Special Contract Rules for High Grade Primary Aluminium

Quality: In conformance with either of the following specifications (A) and (B).

(A) Primary Aluminium of Specification:

Element	Composition, %	
Si	0.10	maximum
Fe	0.20	maximum
Aluminium	99.7	minimum

(B) The Aluminum Association Inc International Designations and Chemical Composition Limits for Unalloyed Aluminum; P1020A (March 2007).

Element	Composition, %	
Si	0.10	maximum
Fe	0.20	maximum
Zn	0.03	maximum
Ga	0.04	maximum
V	0.03	maximum
Others Each **	0.03	maximum
Others Total **	0.10	maximum
Aluminium	Remainder	

** There is no requirement within the Specification to establish the composition values of any other specific element.
